

# AMTRON® Professional+ TC PnC 22 C2

For charging electric vehicles in semi-public and public areas

#### **MENNEKES**

Elektrotechnik GmbH & Co. KG

Aloys-Mennekes-Straße 1 57399 Kirchhundem GERMANY

www.**MENNEKES**.org

## **Equipment features**

#### General

- Mode 3 charging (IEC 61851-1)
- Plugs and sockets according to IEC 62196-2
- Communication with the vehicle according to ISO 15118
- Maximum charging power: 44 kW
- Connection: 1-phase / 3-phase
- Max. charging power configurable by qualified electrician
- MENNEKES installation box
  - Simplified assembly
  - Possible preassembly
- Calibrated energy meter, readable from outside (MIDcompliant for three-phase supply network connection only)
- LED status indicator
- Permanently connected charging cable with type 2 (4 m)
- Enclosure made of Plastic
- Color: light gray (RAL 7035)
- Multi-function button
  - Switch the residual current device and the circuit breaker back on again from the outside
  - Switch the residual current device back on again from the outside
  - Check the residual current device for damage from the outside

#### User web interface (for EV drivers)

- Monitoring of charging processes
- Data export of all charging processes in CSV format
- Whitelist for RFID card management

#### **Authorisation options**

- Autostart (without authorisation)
- RFID (ISO / IEC 14443 A)
  - Compatible with MIFARE classic and MIFARE DESFire
- Via a backend system
- Plug and Charge
  - According to ISO 15118
  - Via vehicle ID (Autocharge)

#### **Networking options**

- Connection to a network via LAN / Ethernet (RJ45)
- Networking multiple products via LAN / Ethernet (RJ45)
- Loop-through of up to 50 charging points via the integrated switch

#### Options for connecting to a backend system

- Via the integrated wireless modem (2G (GSM) / 3G (UMTS) / 4G (LTF))
  - Micro-SIM card required
- Via LAN / Ethernet (RJ45) and an external router
- Support for OCPP 1.5s, OCPP 1.6s and OCPP 1.6j communication protocols

#### Options for local load management

- Reduction of the charging current via an external control signal (downgrade)
- Reduction of the charging current via an external control signal (downgrade) of the upstream, external energy meter type Siemens PAC2200
- Static load management
- Dynamic load management for up to 100 charging points (phase exact)
- Reduction of the charging current in case of uneven phase load (unbalanced load limitation)
- Local blackout by connecting an external Modbus TCP energy meter

### Options for connecting to an external energy management system (EMS)

- Via Modbus TCP
- Via EEBus
- Dynamic control of the charging current via an OCPP system (smart charging)

#### Integrated protective devices

- DC residual current monitoring > 6 mA with tripping characteristics in accordance with IEC 62955
- Residual Current Device type A
- Circuit breaker
- Shunt release, in order to disconnect the charging point voltage from the mains in case of a fault (welded load contact, welding detection)

## **Technical data**

| AMTRON® Professional+ TC PnC 22 C2                           |                  | 151822202              |  |
|--|------------------|------------------------|--|
| Max. charging power Mode 3 [kW]                              | Charging point 1 | 22                     |  |
|  | Charging point 2 | 22                     |  |
| Connection   | Charging point 1 | 1-phase / 3-phase      |  |
|  | Charging point 2 | 1-phase / 3-phase      |  |

| Weight [g]   |                  | 21000                  |  |
| Standard   |                  | IEC 61851, IEC 61439-7 |  |

The specific standards according to which the product was tested can be found in the declaration of conformity for the product.

## **Technical data**

| Permissible ambient conditions                |      |      |
|---|------|------|
|   | Min. | Max. |
| Ambient temperature [°C]                      | -25  | 40   |
| Average temperature over 24 hours period [°C] |      | 35   |
| Altitude [m above sea level]                  |      | 2000 |
| Relative humidity [%]                         |      | 95   |

| Protective devices       |                        |
|--------------------------|------------------------|
| Personal protection (RC) | 40 / 0,03A, 4p, type A |
| Load safety (LS)         | C-32A, 3p+N, 10kA      |
| Control fuse (LS)        | B-6A, 2p, 10kA         |

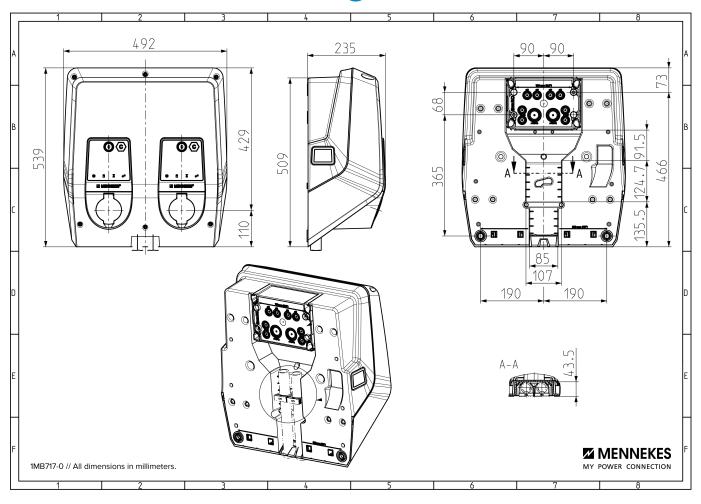

## **Technical data**

| Supply line terminal strip        |                   |      |
|-----------------------------------|-------------------|------|
| Number of terminals               | 5x2               |      |
| Conductor material                | Aluminium, Copper |      |
|                                   | Min.              | Max. |
| Clamping range - rigid [mm²]      | 2.5               | 25   |
| Clamping range - flexible [mm²]   | -                 | -    |
| Clamping range with ferrule [mm²] | 1.5               | 16   |
| Tightening torque [Nm]            | 2.5               | 2.5  |

| Downgrade input terminals         |      |      |  |
|-----------------------------------|------|------|--|
| Number of terminals               | -    |      |  |
| Coil voltage [V]                  | 230  | 230  |  |
|                                   | Min. | Max. |  |
| Clamping range - rigid [mm²]      | 0.14 | 4    |  |
| Clamping range - flexible [mm²]   | 0.14 | 2.5  |  |
| Clamping range with ferrule [mm²] | 0.14 | 2.5  |  |
| Tightening torque [Nm]            | -    | -    |  |
